DESK LAMP

DURING THE INTERNATIONAL BACCALAUREATE DIPLOMA PROGRAM, I BUILT A LAMP MADE OF STAINLESS STEEL TOGETHER WITH A PORTFOLIO.

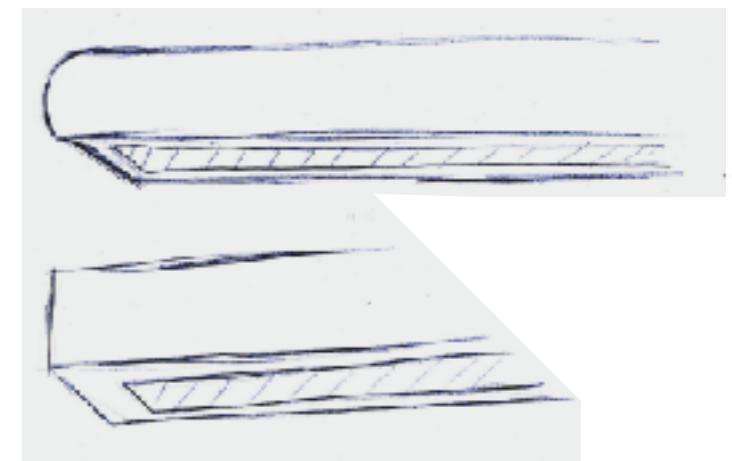

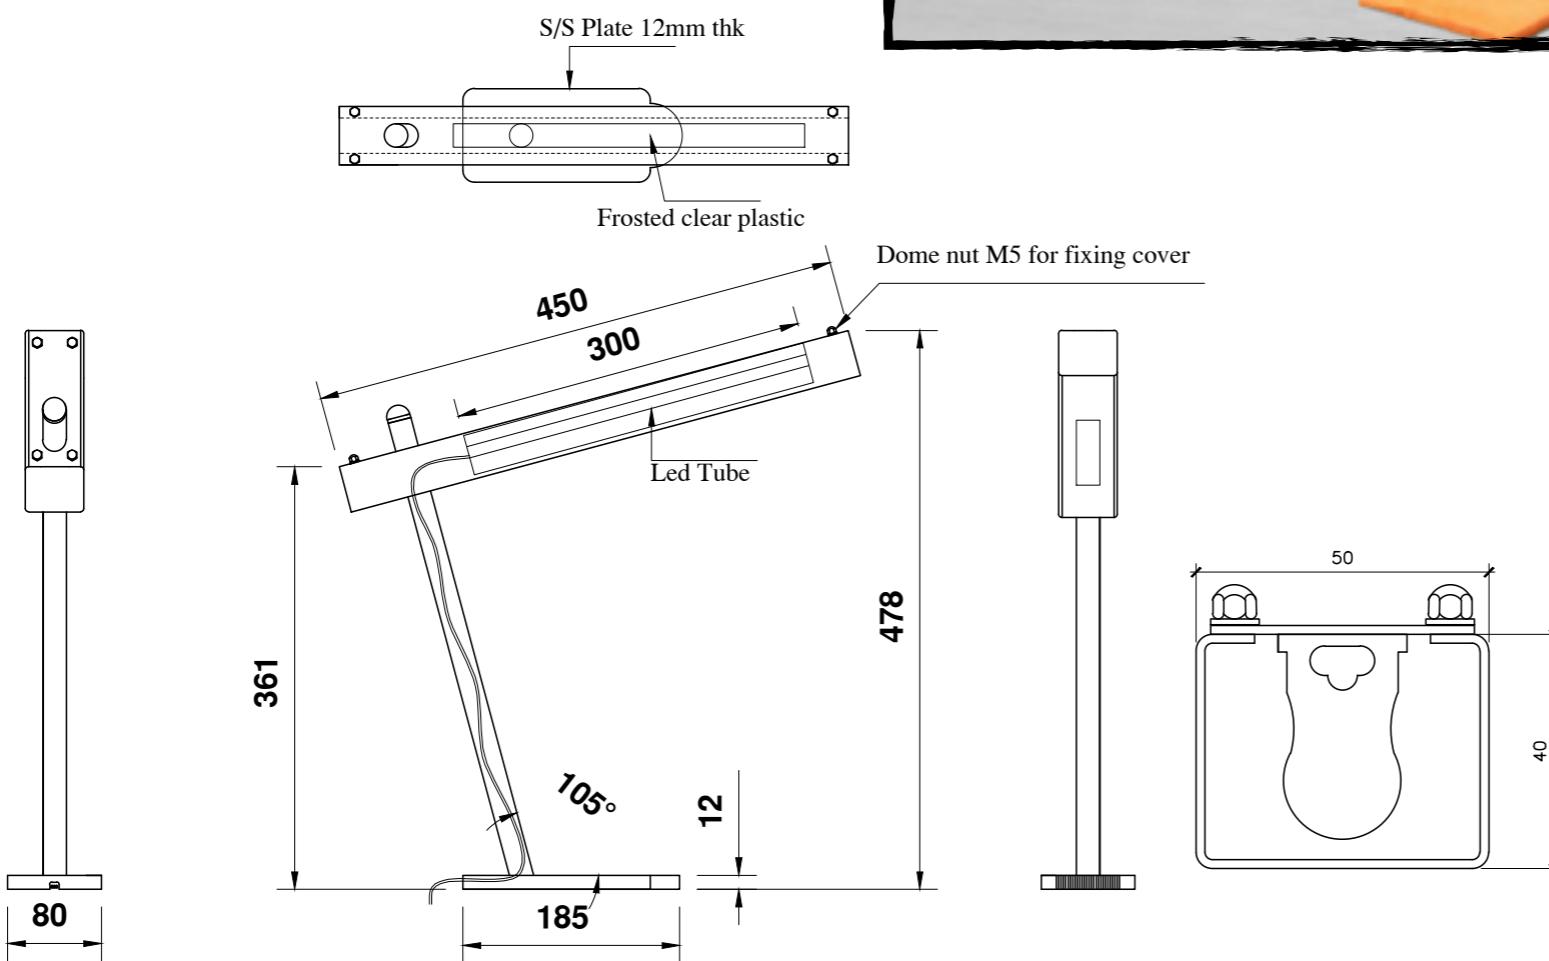

PREMIUM DESK LAMP

Built a desk lamp made of 18/10 stainless steel attached with an LED tube that emits warm light at school. All the resources and tools were available at the DT workshop.

Before manufacturing the lamp, a 3D modelling was produced in a scale model with the help of Creative Aided Design.

A web portfolio of all the artefacts which I built can be found in the link below: <https://anglun.wixsite.com/portfolio>

IGCSE

LAPTOP COOLER

DURING THE IGCSE, I BUILT A LAPTOP COOLER MADE OF ACRYLIC IN THE SHAPE OF AN APPLE LOGO INSPIRED BY MY MACBOOK.

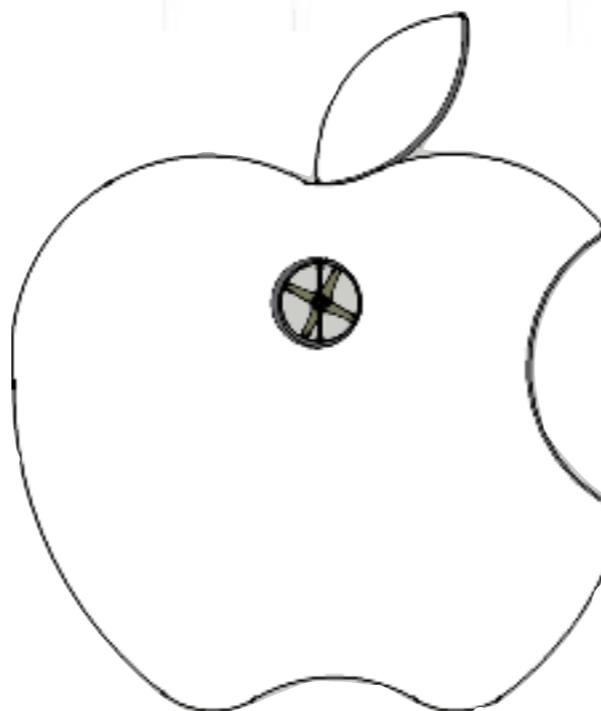

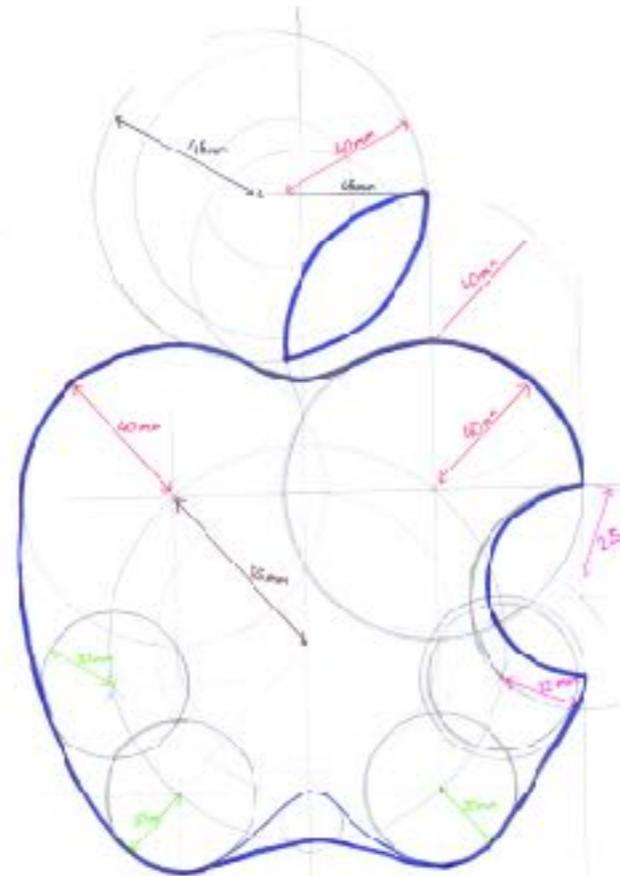

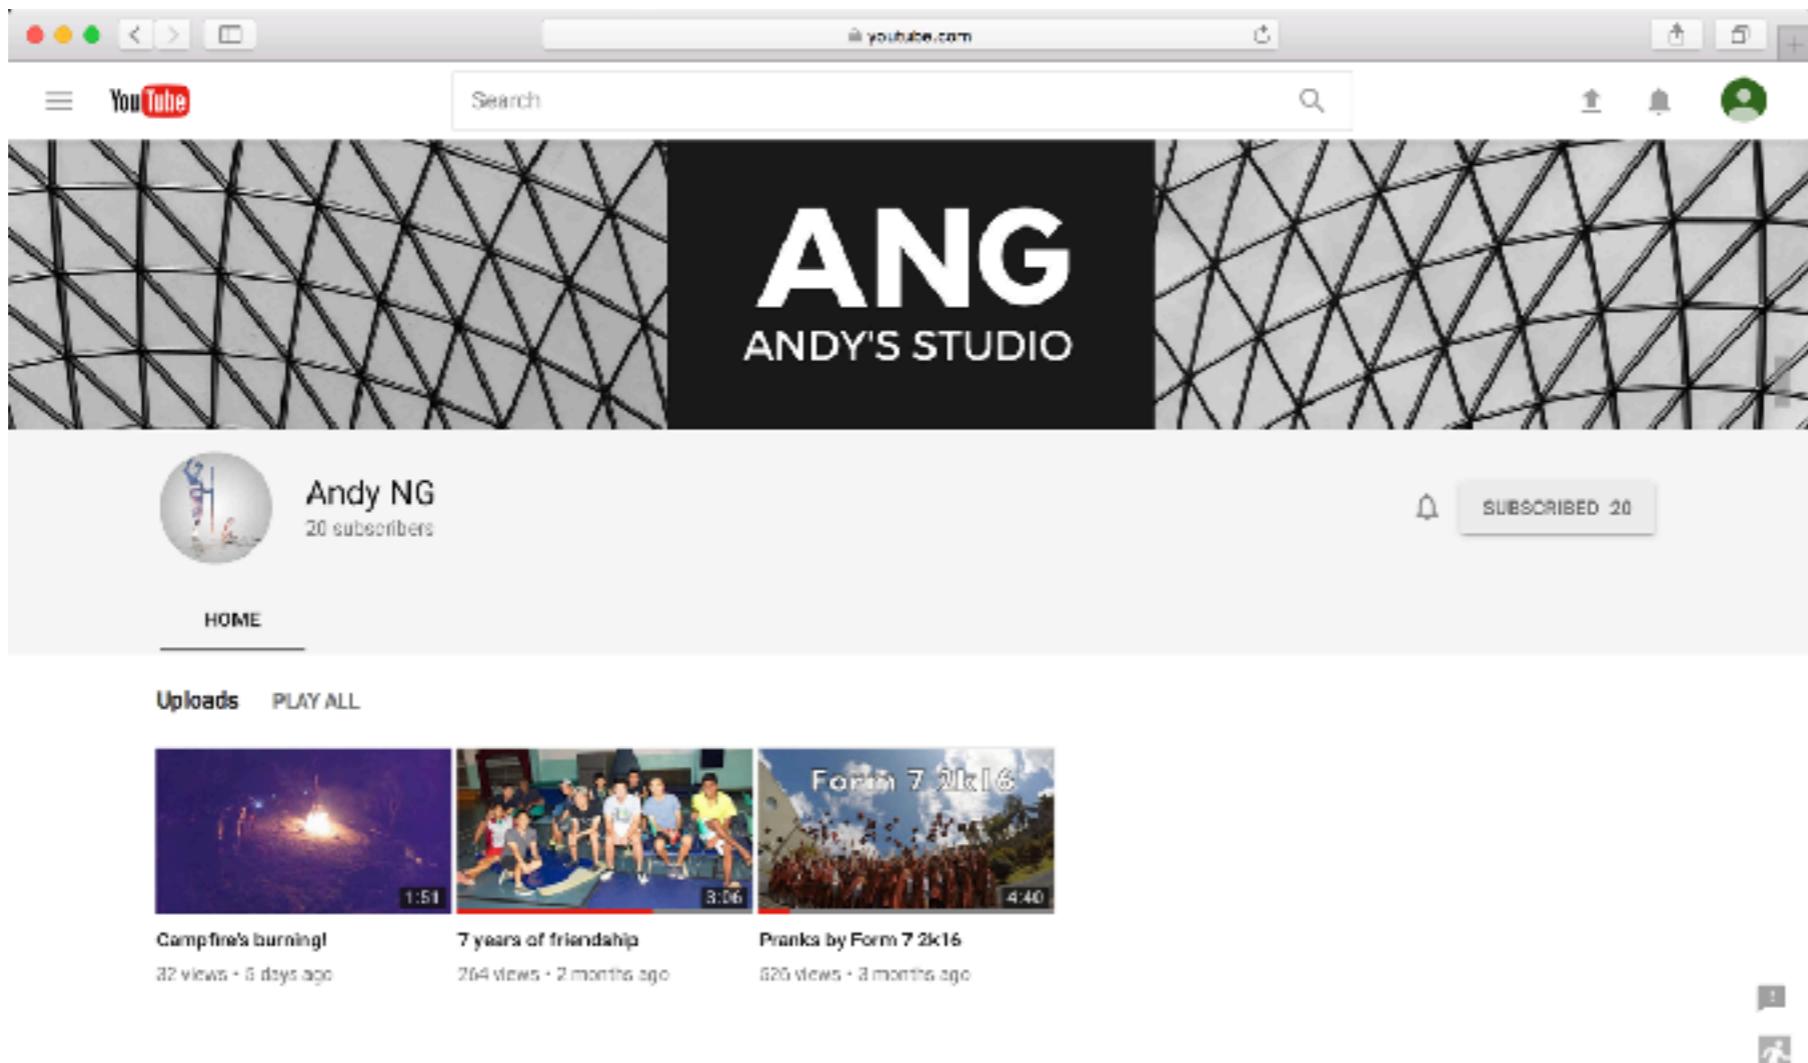

LAPTOP COOLER

Built a laptop cooler out of transparent acrylic glass. Inspired from apple products, I used the apple logo as the base shape of the laptop cooler. With my knowledge in locus, I was able to make my own measurements of the precise apple logo.

A web portfolio of all the artefacts which I built can be found in the link below: <https://anglun.wixsite.com/portfolio>

YOUTUBE

VIDEO & LOGO

I STARTED UPLOADING VIDEOS ON YOUTUBE AND DEVELOPED A KEEN INTEREST FOR VIDEO EDITING. I EVENTUALLY PRODUCED MY OWN LOGO.

VIDEO EDITING/HOMEMADE VIDEOS

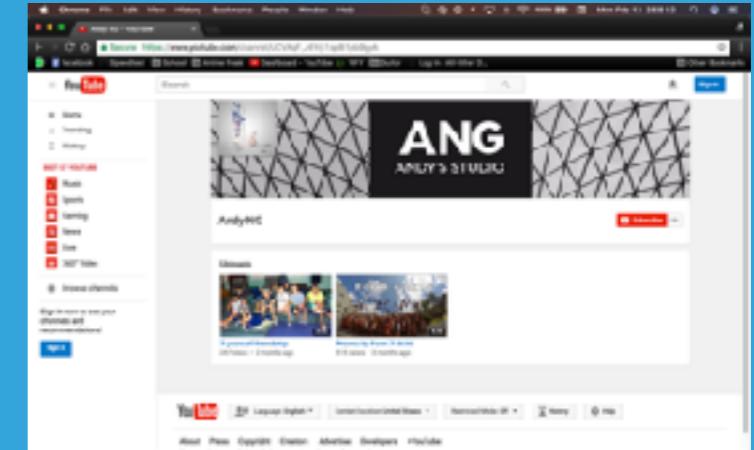

YOUTUBE CHANNEL

During the last few days of high school, the classmates played pranks and jokes with friends and teachers. This video was used for the school leaver's assembly and shared with the school community.

A montage to celebrate the friendship among the 2016 graduating cohort over the 7 years at Le Bocage.

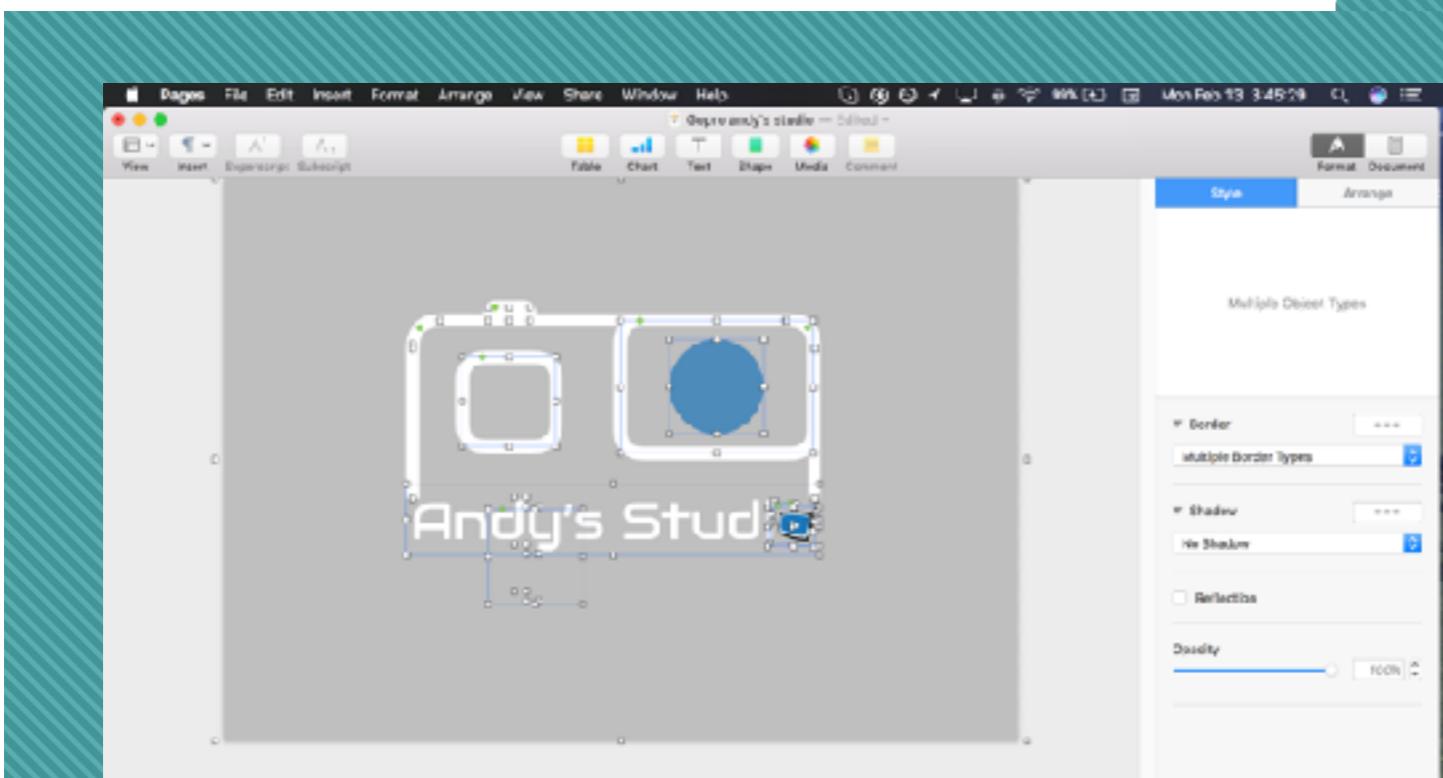

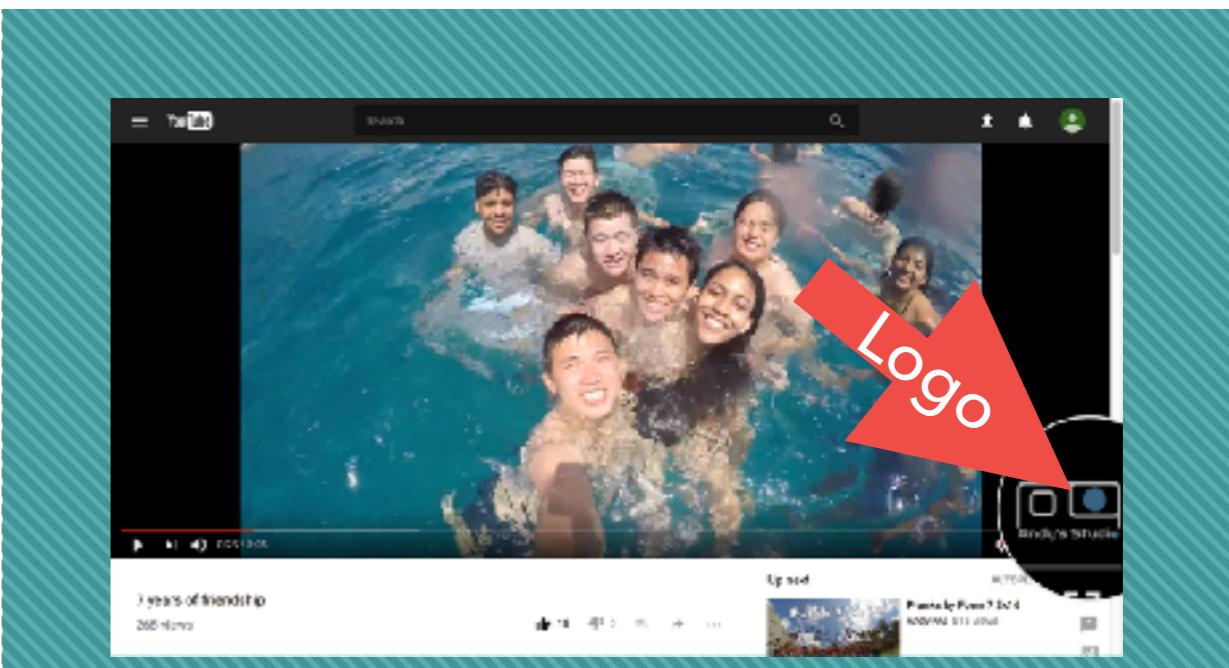

All YouTube videos were recorded with a GoPro and then compiled using Final Cut Pro. A screenshot of what my youtube channel is found in the link below:

https://www.youtube.com/channel/UCVAqF_J4Yrjt1qpB1pb9gyA

CREATING LOGO

Using photoshop, I was able to make 2 unique logo designs that would characterise my YouTube Channel.

This designed logo was inspired by the iconic action camera (GoPro) which is my favourite camera. The logo is used as a signature symbol on all my YouTube videos (located bottom right of each video).

NOTE: PAGES (WORD VERSION FOR MAC OS) WAS MOSTLY USED TO CREATE THE LOGO

CREATING LOGO

With the use of Photoshop, I learned how to create another type of logo which I used for my profile logo on my YouTube Channel. The first picture was a raw format from a Canon DSLR taken in Mauritius, and the second was taken from the Internet.

POSTER OF MAURITIUS

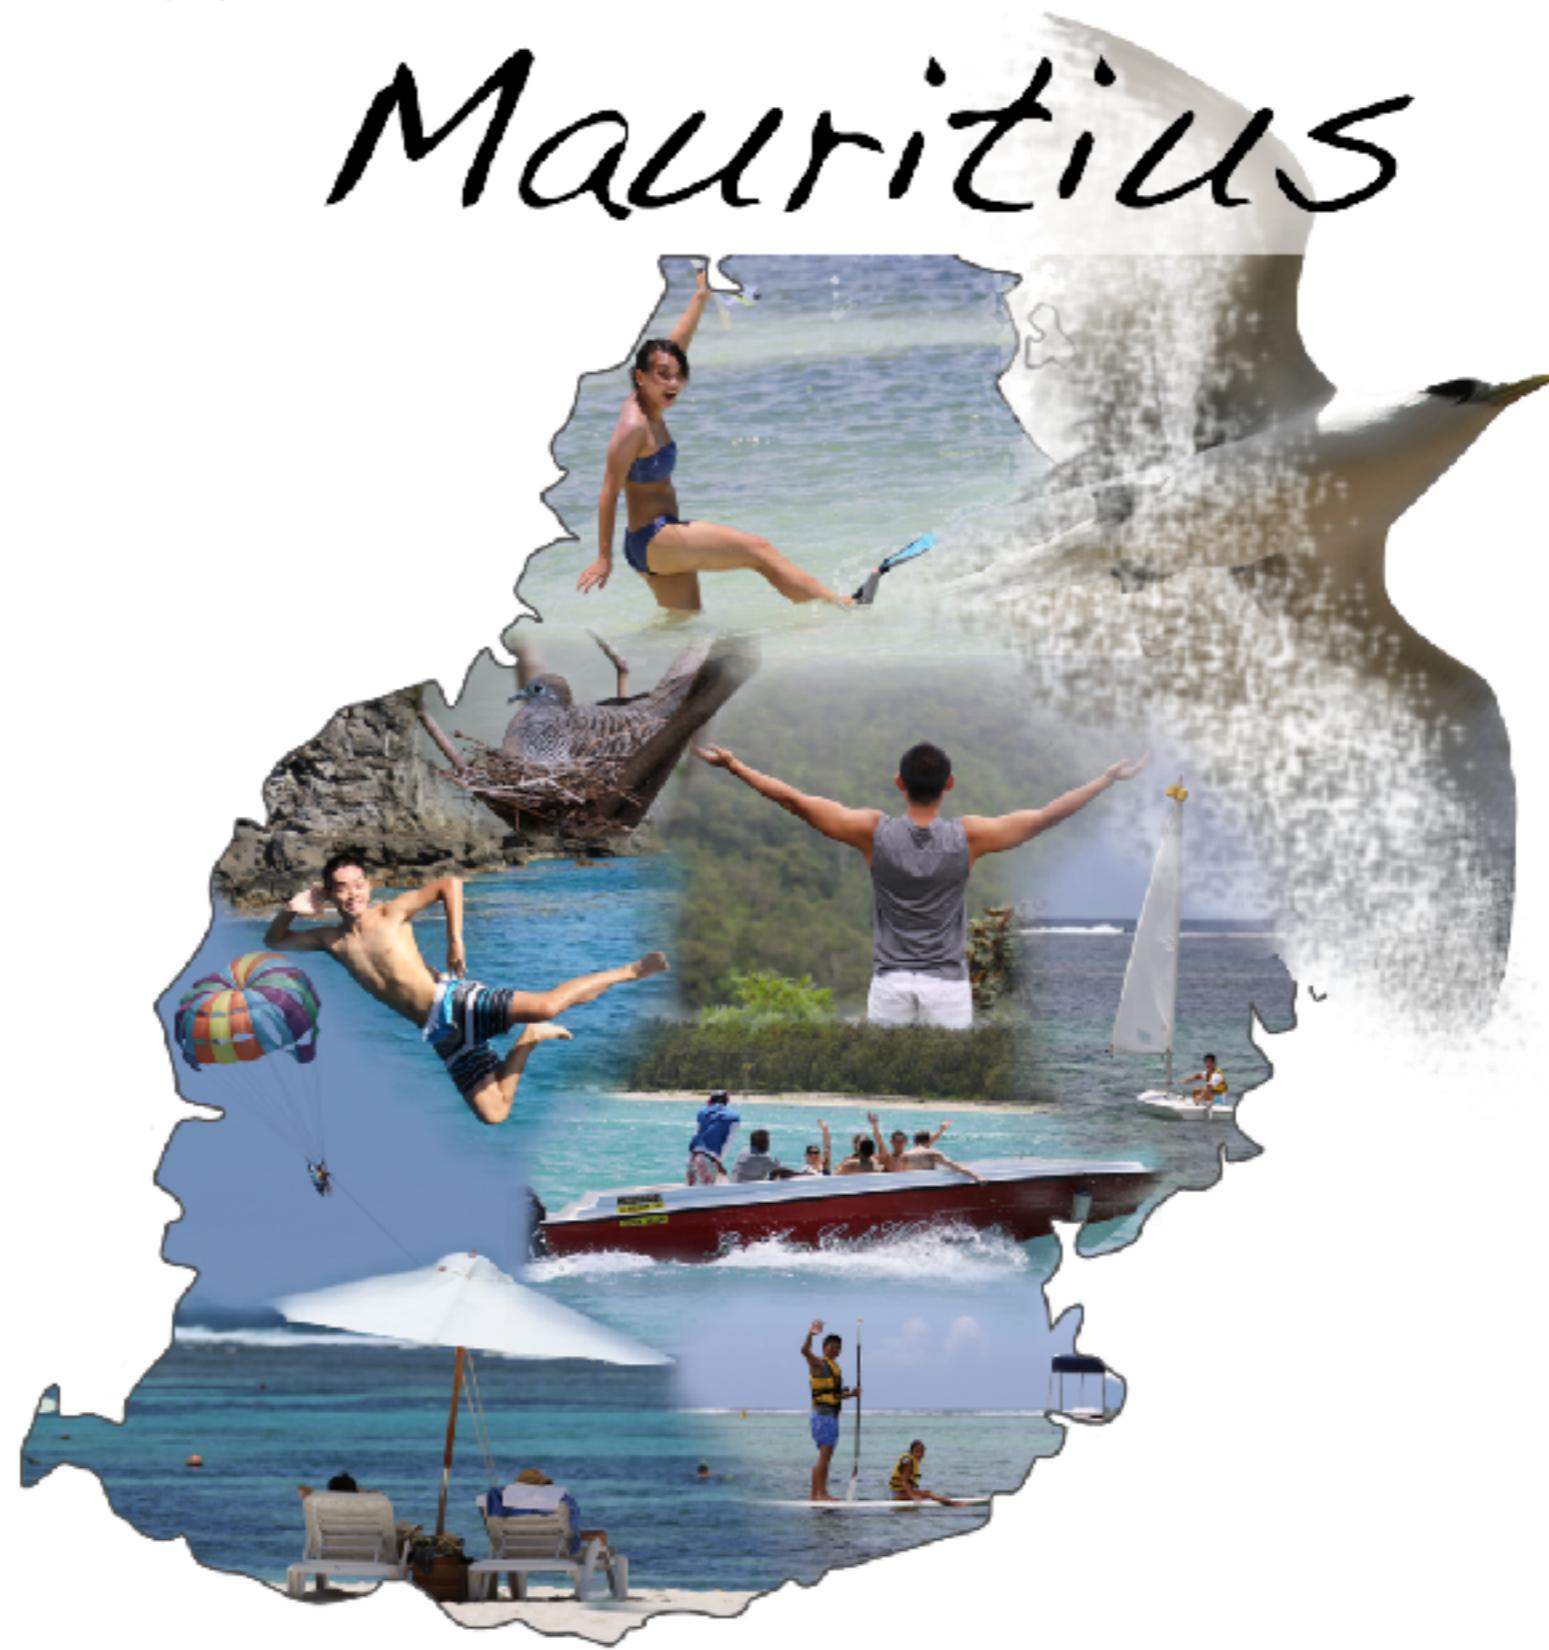

POSTER OF MAURITIUS

- ▶ Mauritius, being a paradise island, gives opportunities for unique photos.
- ▶ Using my own pictures and an outline of Mauritius, I created a poster with the help of photoshop.
- ▶ I also enjoy using photoshop as a hobby.

WHEN DESIGN MEETS SCOUTS

PROMOTING SCOUTS

As a scout leader, I actively promote the association as a fun and invaluable experience for current scouts and to attract new scouts. I created a Facebook page to extend the reach and interaction with parents and members.

<https://www.facebook.com/La-27%C3%A8me9th-Lower-Plaine-Wilhems-Scout-Troop-314959112236720/>

Since the beginning of scouts, the tradition is to build a campfire. To capture this tradition, I made a video of the scouts building a gigantic campfire: <https://youtu.be/1mSe5TeC2rA>

Creative Work #6

PAINTING A BANNER

As Chief Patrol and in concert with the members, we chose falcon as a symbol to represent our group. I then designed and painted the banner with the use of acrylic paint. The banner was used to represent our patrol during the campfire.

Here is a picture of my patrol during our annual week-long camp, living under a tent in a forest. See the link below for a time-lapse video of the banner being painted. <https://youtu.be/m8fDZTSwp-w>
